Document positioning

This business plan is designed to support discussions with car wash owners, development partners and early commercial stakeholders. It focuses on the operating model, partner proposition, customer proposition and launch plan.

1. Executive Summary

WashRewards SA is a proposed mobile and web-based platform that connects vehicle owners with registered car wash businesses across Johannesburg and, later, greater Gauteng and South Africa. The platform follows a marketplace model similar to popular on-demand platforms, but is specifically designed for car wash bookings, payments, loyalty rewards and customer experience management.

Customers will use the app to find registered car washes, compare prices and ratings, book a wash, pay securely through the app, earn loyalty points and receive a R100 digital voucher after every five completed paid washes. The voucher can be redeemed at any participating WashRewards partner car wash, subject to voucher rules and availability.

For car wash partners, the platform provides new customer acquisition, repeat business, digital payment acceptance, verified reviews, customer insights, marketing support and a structured loyalty programme without requiring each car wash to build its own technology.

Core promise

For customers: convenience, trusted choices, cashless payments and rewards. For car washes: more repeat business, better visibility, digital tools and measurable customer growth.

2. Business Overview

Item	Description
Business name	WashRewards SA (working brand name)
Business model	Digital marketplace, booking platform, loyalty programme and partner network for car wash services
Primary launch region	Johannesburg, with initial focus on Sandton, Rosebank, Midrand, Fourways, Randburg, Roodepoort, Soweto, Bedfordview and surrounding areas
Primary customers	Private vehicle owners, working professionals, residents in estates, students, families, fleet operators and corporate employees
Primary partners	Independent car washes, fuel station car washes, shopping centre car washes, dealership wash bays and professional detailing businesses
Revenue streams	Transaction commission, premium listings, customer premium subscriptions, sponsored promotions, shuttle/e-hailing partner margins and corporate/fleet packages

The business starts as a Johannesburg pilot and expands through a partner-led network. Every approved car wash becomes both a service location and a local customer acquisition channel through branded posters, flyers and unique QR registration codes.

3. Problem Statement

Many car wash businesses in Johannesburg operate successfully but remain heavily dependent on walk-in traffic, cash payments, manual loyalty cards and word-of-mouth marketing. This creates missed opportunities for repeat sales, structured customer data and measurable promotions.

- Customers often do not know which nearby car wash is reliable, available or well-rated.
- Car washes usually have limited digital visibility and little access to repeat-customer data.
- Paper loyalty cards are easy to lose, difficult to verify and hard to manage across multiple locations.
- Cash payments create inconvenience and security concerns for both customers and businesses.
- Customers who are busy at work or at home often avoid car washes because waiting time is uncertain.
- Service quality differs widely across locations, and many businesses do not have a structured review system.

4. Proposed Solution

WashRewards SA solves these problems by creating a central digital platform where customers can search, book, pay, review and earn rewards at approved car wash locations. Car wash partners gain a technology layer that helps them compete professionally without large upfront investment.

Customer Need	WashRewards Solution
Find trusted car washes	Location-based search, ratings, verified reviews and partner profiles
Avoid long waiting times	Booking slots, service selection and arrival confirmation
Pay easily	Secure in-app payments and digital receipts
Earn rewards	Loyalty tracking and automatic R100 voucher after the 5th completed paid wash
Trust service quality	Verified reviews, partner tiers and service recovery process
Convenience while waiting	Premium shuttle service for customers within 3 km of the car wash
Partner growth	Digital marketing, QR registration, analytics and repeat-customer programme

5. Target Market and Market Opportunity

Johannesburg and greater Gauteng are suitable launch markets because of vehicle density, commuting patterns, residential estate growth, office parks, shopping centres and high demand for convenient vehicle services.

According to the Road Traffic Management Corporation, South Africa had 13,355,118 registered vehicles in 2024, and Gauteng accounted for 38.41% of the national vehicle population. This supports a Gauteng-first approach because the province has the largest concentration of vehicles in the country. Source: RTMC State of Road Safety Report, Oct-Dec 2024.

Target Segment	Why It Matters	Example Areas
Busy professionals	Need convenience, predictable waiting times and cashless payments	Sandton, Rosebank, Midrand, Waterfall, Bryanston
Residential communities	Regular car care habits and strong local word-of-mouth	Fourways, Randburg, Roodepoort, Bedfordview
Township and high-volume car washes	Strong car wash culture and high walk-in potential	Soweto, Alexandra, Tembisa, Diepsloot
Shopping centre customers	Customers can wash vehicles while shopping	Eastgate, Cresta, Mall of Africa, Clearwater
Corporate fleets	Recurring wash requirements and account-based billing opportunities	Security, sales teams, delivery operators, dealerships

Initial market objective

Launch with 20 to 30 approved Johannesburg car wash partners and build enough geographic coverage for customers to find a partner within convenient driving distance.

6. Product and Service Offering

6.1 Customer App

- Create customer profile and vehicle profile.
- Search car washes by distance, price, rating, service type and availability.
- Book a wash time slot and choose service package.
- Pay securely in the app and receive digital receipts.
- Track loyalty progress toward the R100 voucher.
- Redeem vouchers at participating partner locations.
- Submit verified ratings and reviews after completed washes.

- Access premium membership benefits, including the 3 km customer shuttle service where available.

6.2 Car Wash Partner Portal

- View and manage bookings.
- Confirm customer arrival and completed washes.
- Receive payout reports and transaction summaries.
- View ratings, reviews and customer feedback.
- Track QR code registrations from the partner location.
- Participate in promotions and sponsored campaigns.
- Manage service packages, pricing and operating hours.

6.3 WashRewards Admin Portal

- Approve and manage car wash partners.
- Monitor transactions, vouchers, disputes and payouts.
- Manage customer support and service recovery cases.
- Track partner performance, ratings and tier status.
- Configure loyalty rules, premium memberships and promotional campaigns.
- Generate operational and financial reports.

7. Customer Journey

1. Customer downloads the WashRewards app or scans a partner QR code.
2. Customer registers, adds vehicle details and accepts app terms.
3. Customer searches for a nearby approved car wash.
4. Customer chooses a wash package and time slot.
5. Customer pays securely through the app.
6. Customer drives their own vehicle to the selected car wash.
7. Car wash checks in the booking and completes the service.
8. Customer receives loyalty points and a review request.
9. After the 5th completed paid wash, the customer automatically receives a R100 digital voucher.
10. Customer redeems the voucher at any participating WashRewards partner car wash.

Important operating rule

Customer vehicles may only be driven by the vehicle owner or an authorised driver chosen by the customer. Car wash staff, WashRewards staff, shuttle drivers or third parties do not drive customer vehicles.

8. Loyalty Programme and R100 Voucher

The loyalty programme is the main customer retention engine. It gives customers a reason to keep using the platform and encourages repeat business across the partner network.

Milestone	Customer Benefit	Business Purpose
1st wash	Earn loyalty progress	Introduce the customer to the platform
2nd wash	Earn loyalty progress	Encourage repeat booking
3rd wash	Earn loyalty progress	Build habit and trust
4th wash	Earn loyalty progress	Increase likelihood of voucher completion
5th wash	Earn loyalty progress plus R100 digital voucher	Reward loyalty and encourage future use

8.1 Voucher Rules

- Only completed paid washes booked and paid through the app count toward the 5-wash reward.
- The R100 voucher is issued automatically after the 5th completed paid wash.
- The voucher can be redeemed at any participating WashRewards partner car wash.
- Suggested validity period: 60 days from issue date.
- The voucher is non-cash, non-transferable and cannot be exchanged for money.
- Voucher redemption must be confirmed through the partner portal to prevent fraud.
- Promotional abuse, fake transactions or self-generated bookings may result in account suspension.

9. Premium Subscription and 3 km Shuttle Service

Premium membership adds convenience for customers who want to wash their vehicles without waiting on-site. The customer still drives their own vehicle to the car wash, but may use a shuttle or discounted e-hailing service to travel to a nearby destination while the wash is completed.

Premium Benefit	Description
Priority booking	Premium members receive priority access to selected time slots where available.
Double loyalty points	Promotional double points can be offered during launch campaigns.
Exclusive discounts	Partner-specific discounts and monthly offers.
3 km customer shuttle	Transport for the customer, not the vehicle, within 3 km of participating car washes.
E-hailing/shuttle integration	Potential integration with e-hailing or local shuttle providers at a discounted price for trips within 3 km.
Email and app notifications	Booking confirmations, wash completion alerts, voucher updates and account statements.

9.1 Shuttle Service Rules

- Available only to premium subscribers and only at participating partner locations.
- Maximum distance: 3 km from the car wash location.
- The service transports the customer only. The vehicle remains at the car wash and is not driven by shuttle staff.
- Pickup points may include offices, malls, residential estates, Gautrain stations and business parks within the approved radius.
- Availability may depend on time of day, partner capacity and shuttle/e-hailing partner coverage.
- The app should show the estimated shuttle cost, member discount and expected pickup time before confirmation.

Subscription Option	Illustrative Monthly Fee	Target User
Basic customer	Free	Customers who want bookings, payments, loyalty and reviews
Premium individual	R99 per month	Busy professionals who want priority and shuttle convenience
Family premium	R149 per month	Households with more than one vehicle
Corporate employee plan	From R79 per employee	Companies offering car wash benefits to staff

Premium positioning

Premium membership should be positioned as a time-saving service, especially in Sandton, Rosebank, Midrand, Fourways, Waterfall City, Bryanston and other business areas.

10. Ratings and Reviews System

A verified review system builds trust, improves service quality and helps customers choose reliable car washes. Reviews should only be available after a completed paid wash to prevent fake ratings.

- 5-star overall rating displayed on each partner profile.
- Customers rate cleanliness, staff professionalism, value for money, waiting time and overall experience.
- Written reviews may be submitted after the wash is completed.
- Low ratings below 3 stars automatically create a service recovery case.
- Partners can respond professionally to reviews through the partner portal.
- Top-rated partners can receive better visibility and quality badges.

Rating Level	Meaning	Platform Response
4.5 to 5.0	Excellent	Eligible for Gold or Platinum partner status
4.0 to 4.49	Good	Partner remains in good standing
3.0 to 3.99	Needs improvement	Service improvement review
Below 3.0	Poor	Formal review and possible suspension

11. Car Wash Partner Qualification Requirements

To protect customer trust and service quality, car washes should be approved before joining the platform. The approval process should confirm that each business can deliver consistent service and support the WashRewards operating model.

Requirement	Minimum Standard
Business legitimacy	Business must be legally operating, with clear owner or manager details and a valid South African bank account for payouts.
Fixed operating location	The car wash must operate from a stable and accessible physical location.
Service capability	Must offer at least exterior wash, interior cleaning and vacuum services.
Digital readiness	Must be willing to use the partner portal or partner app to confirm bookings, payments and completed washes.
Voucher participation	Must honour valid WashRewards vouchers according to platform rules.
Customer service	Must maintain professional customer conduct and respond to complaints.
Rating standard	Must maintain an average rating of at least 4.0 after the probation period.
Facility standard	Must have safe vehicle movement areas, reasonable waiting space, adequate lighting and appropriate wash equipment.

11.1 Grounds for Suspension

- Repeated refusal to honour valid bookings or vouchers.
- Fraudulent transactions or fake reviews.
- Consistently poor customer ratings.
- Unsafe practices or damage-related disputes caused by negligence.
- Misuse of the WashRewards brand or customer data.
- Failure to comply with payout, service or operational procedures.

12. Partner Tiers and Quality Standards

Tier	Qualification	Benefits
Bronze Partner	Approved new partner; rating target of 4.0+	Listed on app, standard bookings and loyalty participation

Tier	Qualification	Benefits
Silver Partner	100+ completed washes and rating of 4.3+	Improved search visibility and promotion eligibility
Gold Partner	500+ completed washes and rating of 4.5+	Gold badge, featured placement and campaign priority
Platinum Partner	1,000+ completed washes, rating of 4.8+, premium service capability	Top placement, premium customer referrals and corporate/fleet opportunities

This tiering system encourages service quality, gives customers confidence and motivates partners to compete on professionalism rather than only on price.

13. Partner Marketing Kit and QR Registration

Once a car wash has been approved and onboarded, it should receive a partner marketing kit to convert walk-in customers into registered WashRewards users.

- A3 or A2 customer registration poster with unique QR code.
- Counter cards for the payment area.
- Window stickers identifying the business as an approved WashRewards partner.
- WhatsApp and social media promotional templates.
- Staff talking points to explain the loyalty programme.
- Partner dashboard showing QR scans, registrations, first washes and repeat customers.

13.1 Customer Poster Copy

Poster headline

SCAN. WASH. EARN REWARDS.

Book and pay through WashRewards SA. Earn loyalty progress on every wash. Get a R100 voucher after every 5 completed paid washes. Scan the QR code to register in less than 2 minutes.

Each partner should receive a unique QR code. This allows WashRewards to track which car wash generated each registration and reward top-performing partners.

14. Partner Recruitment Strategy and Printed Flyers

WashRewards will use a direct business development approach to recruit car wash partners. The goal is to visit high-potential car washes, explain the value proposition, leave a printed information flyer and schedule a follow-up meeting with owners or managers who show interest.

1. Identify target car washes in priority Johannesburg areas.
2. Visit the site and introduce the WashRewards concept briefly.
3. Leave a professional printed flyer and partner information pack.
4. Capture the owner or manager's contact details if they show interest.
5. Schedule a formal follow-up meeting or online demo.
6. Assess the car wash against qualification requirements.
7. Sign partner agreement, create partner profile and issue the marketing kit.

Recruitment Material	Purpose
Printed partner flyer	Quick introduction to benefits and meeting invitation
Partner information pack	Explains commission, loyalty, ratings, requirements and onboarding
Meeting presentation	Demonstrates app workflow, partner portal and marketing support
Onboarding checklist	Confirms requirements before launch

Suggested recruitment message

Turn every wash into repeat business. Join WashRewards SA and give your customers bookings, cashless payments, loyalty rewards and verified reviews - without building your own app.

15. Revenue Model

Revenue Stream	How It Works	Illustrative Pricing
Transaction commission	WashRewards earns a percentage of completed in-app wash transactions.	5% to 10% per completed booking
Premium partner listings	Car washes pay for higher visibility and promotional placement.	R299 per month
Customer premium subscriptions	Customers pay monthly for priority benefits and shuttle/e-hailing discounts.	R99 to R149 per month
Sponsored promotions	Partners pay to run app campaigns, weekend specials or launch offers.	Campaign-based pricing
Corporate and fleet plans	Businesses pay for employee or fleet wash management and reporting.	Custom monthly packages
Shuttle/e-hailing margin	WashRewards may earn a small margin or referral fee on discounted 3 km customer trips.	Partner-dependent

The platform should treat loyalty reserves and voucher funds separately from revenue. This protects cash flow and ensures that voucher obligations can be honoured.

16. Voucher Funding and Settlement Model

The R100 voucher is attractive to customers, but it must be funded carefully. At one R100 voucher for every five completed paid washes, the effective loyalty cost is up to R20 per qualifying wash before breakage or expiry. The business should therefore separate the voucher reserve from platform operating revenue.

Model	Description	Pros	Considerations
Loyalty reserve per wash	A fixed portion of each qualifying transaction is reserved toward future vouchers.	Transparent and sustainable	May reduce partner payout unless priced into app package
Co-funded reward	WashRewards and the partner each contribute toward the voucher value.	Shared marketing cost	Requires clear partner agreement
Launch marketing fund	WashRewards funds vouchers during the pilot as a customer acquisition cost.	Strong launch offer	Requires startup funding
Sponsor-supported rewards	Automotive brands, insurers or fuel partners sponsor customer rewards.	Reduces platform cost	Requires sponsorship sales

16.1 Recommended Starting Approach

- For the pilot, create a loyalty reserve of up to R20 per completed qualifying wash.
- Negotiate partner pricing so the app wash price can absorb commission and loyalty costs fairly.
- Track voucher liability in the admin system from day one.
- Set voucher validity at 60 days to reduce unused liability exposure.
- Show partners how repeat visits and app referrals can offset the reward contribution.
- Review redemption data after the first 90 days and adjust the funding model if needed.

Financial discipline

Do not treat collected loyalty reserve money as profit. It should be ring-fenced for voucher redemption and reported separately.

17. Operations Model

Operational Area	Process
Partner onboarding	Assessment, agreement, profile setup, pricing setup, staff training and marketing kit delivery.
Customer onboarding	App registration, vehicle profile setup, payment method setup and optional QR referral attribution.
Booking management	Customer selects service and time; partner confirms capacity; app manages notifications.
Payment settlement	Customer pays in app; platform deducts commission/reserve; partner receives scheduled payout.
Voucher management	System issues, tracks, redeems and expires vouchers automatically.
Ratings and complaints	Verified review request after each completed wash; low ratings create service recovery cases.
Premium shuttle service	Customer requests shuttle/e-hailing trip within 3 km; app displays availability, route and member discount.

A small launch team can initially manage sales, partner support, customer support and operations manually while technology is being developed. As transaction volume grows, automation should be added to reduce support costs.

18. Technology Requirements

Component	Required Functionality
Customer mobile app	Registration, location search, booking, payments, loyalty wallet, vouchers, reviews and notifications.
Partner app/portal	Booking management, check-in, wash completion, payout reports, reviews and QR tracking.
Admin dashboard	User management, partner approvals, voucher liability, reporting, disputes, promotions and analytics.
Payment gateway	Card payments, instant EFT or mobile payment options, refunds and settlement reporting.
Loyalty engine	Counts qualifying washes, issues R100 vouchers, prevents duplicate redemptions and tracks expiry.
Review engine	Verified ratings, moderation tools and partner response features.
Notification system	Email, SMS, WhatsApp or push notifications for booking, payment, wash completion and vouchers.
Shuttle/e-hailing integration	Optional API integration or manual voucher code process for 3 km customer trips.
Analytics	Customer acquisition, repeat rate, partner performance, GMV, commission, reserve and voucher redemption.

18.1 Data and Payment Compliance

Because the platform will process customer personal information, vehicle details, contact details, payment-related information and booking data, it should be designed to comply with South Africa's Protection of Personal Information Act (POPIA). Source: South African Government, Protection of Personal Information Act 4 of 2013.

For card payments, the platform should use a reputable payment service provider and follow PCI DSS requirements. PCI DSS provides technical and operational requirements intended to protect payment account data. Source: PCI Security Standards Council.

19. Marketing and Growth Strategy

19.1 Partner Acquisition

- Target 100 to 150 car washes in the first Johannesburg sales campaign.
- Use printed flyers to introduce the opportunity and schedule interested-partner meetings.

- Offer founding partner benefits to the first 50 approved partners.
- Promote early partners on social media and within the app.
- Use partner results, reviews and customer registration data as case studies.

19.2 Customer Acquisition

- Unique QR registration posters at every partner car wash.
- Welcome bonus points for new customers.
- Referral rewards for customers who invite friends.
- WhatsApp campaigns through partner networks.
- Local influencer and community group promotions in Johannesburg suburbs.
- Corporate employee offers in office parks and business hubs.
- Monthly leaderboard: Top 10 Rated Car Washes in Johannesburg.

19.3 Launch Offers

- First wash discount for new app customers, subject to partner approval.
- Double loyalty points during the first 30 days in selected areas.
- Founding partner badge for early car washes.
- Premium membership launch price for early adopters.

19.4 Partner Scout Programme

To accelerate partner acquisition, WashRewards SA will introduce a performance-based Partner Scout Programme. This programme will use trusted local networks to identify and onboard car wash partners in Johannesburg, Pretoria, Cape Town and other high-potential provinces. It is designed to scale partner recruitment quickly without creating large fixed sales salaries before the platform has launched.

The programme will pay selected scouts R1,500 cash for every 5 approved car wash partners successfully referred and onboarded.

Partner Scout Programme rules:

- A scout is paid only after 5 referred car washes have been approved and onboarded by WashRewards.
- A submitted lead does not qualify for payment unless the car wash passes the partner qualification check.
- Each qualifying car wash must complete the partner interest form, be contacted by WashRewards, sign the partner onboarding agreement and be accepted into the partner network.
- Priority launch areas include Johannesburg, Pretoria and Cape Town, using scouts with strong local community, business and car wash networks.
- Each scout referral must be tracked using a unique scout referral code or registration form so WashRewards can verify who introduced the partner.
- Payments should be processed only after the fifth approved partner is confirmed, to prevent low-quality referrals and duplicate claims.
- WashRewards may introduce monthly leaderboards or additional bonuses for scouts who bring in high-quality partners that remain active and generate customer bookings.

This approach turns partner recruitment into a performance-based marketing channel. It allows WashRewards to reach multiple provinces quickly while keeping acquisition cost linked to actual approved partner growth. For example, if 100 approved car wash partners are recruited through scouts, the direct scout incentive cost would be approximately R30,000, based on R1,500 per 5 approved partners.

20. Financial Assumptions and Projections

The figures below are illustrative planning estimates and should be refined after partner pricing, payment gateway fees, development costs, shuttle terms and actual market testing are confirmed.

20.1 Key Assumptions

Assumption	Base Case
Average wash price	R120
Transaction commission	8%
Loyalty reserve per qualifying wash	Up to R20
Premium customer subscription	R99 per month
Premium partner listing	R299 per month
Voucher value	R100 after every 5 completed paid washes
Voucher validity	60 days

20.2 Illustrative Monthly Run-Rate Scenarios

Scenario	Partners	Active Users	Monthly Washes	GMV	Commission Revenue	Loyalty Reserve	Other Revenue	Estimated Platform Revenue
Pilot	25	1,500	1,000	R120,000	R9,600	R20,000	R5,000	R14,600
Month 12 Target	75	8,000	7,500	R900,000	R72,000	R150,000	R83,000	R155,000
Gauteng Growth	200	25,000	25,000	R3,000,000	R240,000	R500,000	R321,000	R561,000

Note: The loyalty reserve is shown separately because it is a future voucher funding obligation, not operating revenue. Other revenue includes premium subscriptions, premium listings, sponsored promotions and corporate/fleet income assumptions.

20.3 Main Cost Categories

- Mobile app and web platform development.
- Payment gateway fees and transaction processing costs.
- Customer support and partner support.
- Sales staff or commission-based partner recruiters.
- Partner Scout Programme incentives, including R1,500 cash payments for every 5 approved car wash partners.
- Marketing materials, flyers, posters and QR code production.
- Voucher redemptions and loyalty reserve management.
- Shuttle/e-hailing discounts or subsidies for premium members.
- Hosting, analytics, security and ongoing software maintenance.

21. Key Risks and Controls

Risk	Control
Voucher programme becomes too expensive	Ring-fence loyalty reserve, track voucher liability and adjust pricing after pilot data.
Poor partner service damages brand	Partner approval, ratings, mystery checks, complaint escalation and suspension rules.
Fake reviews or fake wash transactions	Only allow verified post-transaction reviews and monitor suspicious activity.
Customers misunderstand shuttle service	State clearly that the shuttle transports customers only; customer cars are not driven by staff.
Payment disputes or failed payouts	Use reliable payment gateway, automated reconciliation and clear payout terms.
Low partner adoption	Offer founding partner incentives, simple onboarding and measurable customer acquisition benefits.
Low customer adoption	Use QR posters, welcome bonuses, referrals, local campaigns and premium convenience benefits.
Data privacy concerns	Implement POPIA-aware consent, privacy policy, secure storage and limited data access.

22. Launch Roadmap

Phase	Timeline	Focus	Target Outcome
Phase 1: Validation	Weeks 1-4	Finalize brand, partner proposition, flyer, landing page and initial partner list.	20 interested car washes and first requirements signed off.
Phase 2: Partner Pilot	Months 2-3	Onboard 20 to 30 approved car washes in priority Johannesburg areas.	Partner network ready for controlled launch.
Phase 3: MVP Launch	Months 4-6	Launch app features: registration, listings, bookings, payments, loyalty and reviews.	First 1,500 registered users and first 1,000 monthly washes.
Phase 4: Premium Services	Months 6-9	Add premium membership and 3 km shuttle/e-hailing discount option.	Premium adoption among professional users.
Phase 5: Gauteng Expansion	Months 9-18	Expand to Pretoria, Centurion, East Rand and West Rand.	100+ partner locations and stronger brand recognition.
Phase 6: National Scale	Year 2 onwards	Roll out to Cape Town, Durban and other major cities.	National partner network and larger corporate/fleet offering.

23. Key Performance Indicators

KPI	Why It Matters
Number of approved partners	Measures network growth and customer coverage.
Registered customers	Measures user acquisition.
Monthly active users	Shows active app usage.
Completed washes	Core transaction volume.
Repeat customer rate	Measures loyalty programme effectiveness.
Voucher redemption rate	Measures reward engagement and liability.
Average partner rating	Measures service quality across the network.
Customer acquisition source	Shows which partners and campaigns generate users.
Premium subscription conversion	Measures adoption of premium convenience services.
Gross transaction value	Measures marketplace scale.
Net platform revenue	Measures commercial performance after commissions and reserves.

24. Conclusion and Call to Action

WashRewards SA has the potential to modernize the car wash industry in Johannesburg by combining booking technology, cashless payments, loyalty rewards, verified reviews and partner-led customer acquisition. The platform gives customers convenience and rewards while giving car wash owners a measurable way to increase repeat business and improve visibility.

The recommended next step is to validate the model with a small group of high-quality car wash partners, finalize the technology requirements with the development company, and launch a controlled Johannesburg pilot before expanding across Gauteng.

Partner invitation

Join WashRewards SA as a founding partner and help build Johannesburg's first trusted digital car wash loyalty and booking network.

Appendix A: Partner Onboarding Checklist

Checklist Item	Status
Business owner/manager contact captured	Pending
Business location verified	Pending
Service packages and prices captured	Pending
Bank details for payouts captured	Pending

Checklist Item	Status
Partner agreement signed	Pending
Partner portal account created	Pending
Staff trained on booking and voucher process	Pending
Unique QR code generated	Pending
Poster and marketing kit delivered	Pending
Partner profile approved and listed	Pending

Appendix B: Printed Partner Flyer Draft

Front Page Copy

WASHREWARDS SA

Turn Every Wash Into Repeat Business

- Get more customers through app bookings.
- Accept secure digital payments.
- Offer customers a powerful loyalty programme.
- Build trust through verified ratings and reviews.
- Receive QR posters and marketing support.
- Track bookings, customers and revenue through a partner portal.

Interested? Let us schedule a free partnership consultation and show you how WashRewards can help grow your car wash.

Back Page Copy

1. Customer books and pays through the app.
2. Customer drives to your car wash.
3. You complete the wash and confirm it in the partner app.
4. Customer earns loyalty progress.
5. Customer returns for more washes and eventually earns a R100 voucher.

Founding partner benefits may include reduced commission, free onboarding, featured app placement and free launch marketing materials.

Appendix C: Customer QR Poster Draft

SCAN. WASH. EARN REWARDS. Book and pay online. Earn loyalty progress. Get a R100 voucher after every 5 completed paid washes. Rate your car wash experience. Access premium benefits where available. Registration takes less than 2 minutes.	UNIQUE PARTNER QR CODE PLACEHOLDER
--	--

Each partner receives a unique QR code so WashRewards can measure registrations, first washes and repeat customer activity generated by that specific location.
